

MUHAMMAD MAROOF

FULL STACK DEVELOPER | MOBILE & AI AUTOMATION SPECIALIST

mmaroof341@gmail.com | +92 305 1526463 | linkedin.com/in/mmaroof11 | github.com/muhammadmaroof11 | Lahore, Pakistan

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer specializing in secure, scalable web and mobile solutions. Proven expertise in Vue 3, React, and cross-platform mobile development (Ionic/Capacitor, Flutter). Built and shipped production-grade AI SaaS platforms solo — from architecture to Android APK deployment. Passionate about AI automation workflows, clean composable design, and robust security architectures.

TECHNICAL & SECURITY SKILLS

Frontend:	Vue 3, React.js, Tailwind CSS, GSAP, Vite, Framer Motion
Backend & DB:	Node.js, Python (Flask), Supabase, MongoDB, Firebase, PostgreSQL
Mobile Apps:	Ionic, Capacitor, Flutter
AI & Workflow:	Agentic AI Systems, n8n Automation
Security Core:	JWT & OAuth 2.0, AES-256 Encryption, DOMPurify XSS Guard, Root/Jailbreak Detection

PROFESSIONAL EXPERIENCE

Full Stack Developer | Byte Force IT Solutions Feb 2026 – Present

- Spearheading front-end development for native mobile applications and synchronized web versions.
- Managing cross-platform interface consistency and performance optimization across multiple internal products.

Full Stack Developer (Contract) | Sairay.pk Nov 2025 – Feb 2026

- Architected a Flask-based REST API for dynamic inventory and category management.
- Optimized database queries and frontend logic, drastically improving discovery speed by 40%.

Content Lead | GDGoC-UE Sep 2025 – Present

- Leading technical documentation and content strategy; organizing hackathons to foster community growth.

SELECTED PROJECTS

Bytely Personal Assistant (SaaS AI Platform) Vue 3, Ionic/Capacitor, Pinia, AES-256, Stripe

- Architected full-stack hybrid app (web + Android APK) featuring 7 specialized AI agents and router-level credit gating.
- Implemented AES-256 encrypted IndexedDB offline cache with a proactive background synchronization service.
- Refactored complex monolithic components (111 KB) into domain-specific composables (~52 KB), drastically improving maintainability.
- Enforced rigorous security measures including JWT interceptors, DOMPurify XSS prevention, and prompt injection detection.

FoodLink (Gourmet Logistics Platform) Vue 3, Supabase, Capacitor, Tailwind CSS

- Engineered a multi-portal ecosystem dynamically generating 4 distinct Android apps (Diner, Rider, Merchant, Admin) from a single Vue codebase.
- Integrated native background geolocation and local notifications for real-time delivery tracking and dispatch signals.

Mentairo (Mobile Mentorship Platform) Flutter, Firebase, Supabase, Agora SDK

- Developed a mobile platform featuring real-time video and audio consultations via Agora SDK.
- Scaled backend architecture by migrating from Firebase to Supabase PostgreSQL for enhanced data integrity and real-time syncing.

CryptoAnalyzer (DeFi Dashboard) MERN Stack, CoinGecko API

- Developed a real-time crypto price tracking dashboard with live API integration, deployed dynamically with health checks on Render.

EDUCATION

BS Computer Science 2023 – Present

University of Education

Intermediate (ICS) 2021 – 2023

Govt. Islamia College
